ShareSpace Coworking React Native Project

1. Introduction

- This project is based on the Fellow Coworking website based in Spokane WA. This website was used in the previous bootcamp projects. Fellow does not have a mobile app.
- The app has multiple screens and navigation options to reach those screens. Each screen is long enough to be scrollable and has a footer component with navigation links.
- A contact form is provided for further information.

2. User Interface Design and Prototype

- Give some sample user interface layouts for your application. You can use either wireframe diagrams, prototyping tools, or sketches to construct the mock representations of your UI design
